RE: Quarterly Groundwater Events: November 2008 - December 2009 & Request for a NFA Determination
Former Chevron Service Station
Ecology VCP No. SW0870
3731 Pacific Avenue SE
Olympia, Washington

Dear Mr. Middleton:

Please find enclosed for your review a copy of the *Quarterly Groundwater Events: November 2008 - December 2009* for the Former Chevron Service Station located at the above referenced address in Olympia, Washington. We respectfully request a determination of No Further Action for this property based on the findings presented in the enclosed report.

If you have questions regarding the attached report or require additional information, please feel free to contact us at 360-352-9835.

Sincerely,
Associated Environmental Group, LLC

Yen-Vy Van, P.G., P.H.G.
Principal Hydrogeologist

Enclosure: AEG's report

Olympia, WA 98501

RE: Quarterly Groundwater Events: November 2008 - December 2009
Former Chevron Service Station
Ecology VCP No. SW0870
3731 Pacific Avenue SE
Olympia, Washington

Dear Mr. Detray:

With the exception of monitoring well MW-2, the remaining wells at the Former Chevron Service Station property had met cleanup levels for all constituents of concern. Ecology stipulated in the Fall of 2008 that additional groundwater monitoring and sampling be conducted at MW-2. Groundwater would be analyzed only for total lead for an additional four quarters due to an elevated detection of total lead in October 2008.

Associated Environmental Group, L.L.C. (AEG) has prepared this letter report to summarize the results of the *Quarterly Groundwater Monitoring/Sampling Events – November 2008 through December 2009* conducted for the Former Chevron Service Station property, located at 3731 Pacific Avenue SE in Olympia, WA (the Site).

DISCUSSION

The four consecutive quarterly groundwater events were conducted at the Site on the following dates: 1) November 7, 2009; 2) June 12, 2009; 3) September 2, 2009; and 4) December 1, 2009. These sampling events represent the final environmental investigation task completed for the Site prior to requesting the Washington State Department of Ecology (Ecology) for a *No Further Action* determination.

AEG completed the following activities during each groundwater monitoring/sampling event:

- Obtained depth-to-water measurement at MW-2.
- Conducted limited well development/purge via peristaltic pump with dedicated tubing.
- Collected a representative ground water sample from MW-2 in laboratory provided containers. The containers were labeled and placed in a portable chilled ice chest and transported to Libby Environmental Chemistry Laboratory following standard chain-of-custody procedures.

1728 State Avenue, Suite 101 • Olympia, WA • 98506-4557
Phone: 360-352-9835 • Fax: 360-352-8164 • Email: admin@aegwa.com

- The groundwater samples were submitted for laboratory analysis of total lead via EPA Method 7421.
- Compared the analytical results to Ecology Model Toxics Control Act (MTCA) Method A groundwater cleanup level for lead.

GROUNDWATER ANALYTICAL RESULTS

Table 1, *Summary of Quarterly Groundwater Analytical Results*, presents the laboratory results for the four sampling events from November 2008 through December 2009 at monitoring well MW-2 along with previous groundwater analytical results for the Site. The laboratory analytical results are included in Attachment A, *Groundwater Analytical Laboratory Results.*

DISCUSSION

The findings and conclusions derived during the Quarterly Groundwater Events: November 2008 through December 2009 are as follows:

- Groundwater analytical results indicated two detections of lead at MW-2 during the November 2008 and June 2009 Quarterly Groundwater Events, at 9.3 micrograms per liter (ug/L) and 6.5 ug/L, respectively. These detections are below Ecology MTCA Method A groundwater cleanup level for lead (refer to Table 1).
- No detectable concentrations of lead were reported for the remaining groundwater events conducted in September and December 2009.

CLOSING

AEG has successfully completed four consecutive quarterly groundwater events at all monitoring wells at the Site and have showed that there is no residual petroleum hydrocarbons or metal groundwater contamination at the Former Chevron Service Station property.

The findings and conclusions derived for the Site from groundwater monitoring and sampling events from August 2007 through December 2009 are as follows:

- No detectable concentrations of gasoline range total petroleum hydrocarbons (TPH) during these events;
- No detectable concentrations of volatile organic compounds associated with gasoline range TPH; and
- Either no detectable concentrations of lead or detections below Ecology groundwater cleanup level (refer to Table 1).

1728 State Avenue, Suite 101 • Olympia, WA • 98506-4557
Phone: 360-352-9835 • Fax: 360-352-8164 • Email: admin@aegwa.com

AEG recommends petitioning Ecology for a *No Further Action* determination for the former Chevron Service Station based on the findings presented above.

Sincerely,
Associated Environmental Group, L.L.C.

Yen-Vy Van, P.G., P. H.G.
Principal Hydrogeologist

Olympia, WA 98506

Dear Mr. Chun:

Please find enclosed the analytical data report for the DeTray's Project located in Olympia, Washington. A water sample was received and analyzed for Dissolved Lead by EPA Method 7000 Series on November 11, 2008.

The results of the analyses are summarized in the attached tables. Applicable detection limits and QA/QC data are included. An invoice for this analytical work is also enclosed.

Libby Environmental, Inc. appreciates the opportunity to have provided analytical services for this project. If you have any further questions about the data report, please give me a call. It was a pleasure working with you on this project, and we are looking forward to the next opportunity to work together.

Sincerely,

Sherry L. Chilcutt
President

Dear Mr. Chun:

Enclosed please find the analytical data report for the Detray Project located in Olympia, Washington. Water samples were analyzed for Lead by EPA Method 7421 on December 5, 2009.

The results of the analyses are summarized in the attached tables. Applicable detection limits and QA/QC data are included. An invoice for this analytical work is also enclosed.

Libby Environmental, Inc. appreciates the opportunity to have provided analytical services for this project. If you have any further questions about the data report, please give me a call. It was a pleasure working with you on this project, and we are looking forward to the next opportunity to work together.

Sincerely,

Sherry L. Chilcutt
